PROGRAM 2431.4/page 1 of 4 Prevention and Treatment of Sports-Related Concussions and Head Injuries

PREVENTION AND TREATMENT OF SPORTS-RELATED 2431.4 CONCUSSIONS AND HEAD INJURIES

A concussion is a traumatic brain injury caused by a direct or indirect blow to the head or body. In order to ensure the safety of pupils that participate in interscholastic athletics, it is imperative that student-athletes, coaches, and parents are educated about the nature and treatment of sports-related concussions and other head injuries. Allowing a student-athlete to return to play before recovering from a concussion increases the chance of a more serious brain injury.

Every school district that participates in interscholastic athletics is required to adopt a policy concerning the prevention and treatment of sports-related concussions and other head injuries among student-athletes in accordance with the provisions of N.J.S.A. 18A:40-41.1 et seq. the purpose of this Policy, "interscholastic athletics" shall be Kindergarten through twelfth grade sponsored athletic programs where teams or individuals compete against teams or individuals from other schools or school districts.

The school district will adopt an Interscholastic Athletic Head Injury Training Program to be completed by the team or school physician, licensed athletic trainer(s) involved in the interscholastic athletic program, all staff members that coach an interscholastic sport, designated school nurses, and other appropriate school district personnel as designated by the Superintendent. This Training Program shall be in accordance with guidance provided by the New Jersey Department of Education and the requirements of N.J.S.A. 18A:40-41.2.

The Principal or designee shall distribute the New Jersey Department of Education Concussion and Head Injury Fact Sheet and Parent/Guardian Acknowledgement Form to every student-athlete who participates in interscholastic sports. or designee shall Principal obtain

acknowledgement of the receipt of the Fact Sheet by the student-athlete's parent and keep on file for future reference.

Prevention of a sports-related concussion and head injuries is an important component of the school district's program. The school district may require pre-season baseline testing of all student-athletes before the student-athlete begins participation in an interscholastic athletic program.

Any student-athlete who exhibits the signs or symptoms of a sports-related concussion or other head injury during practice or competition shall be immediately removed from play and may not return to play that day. medical assistance shall be contacted when symptoms get worse, loss of consciousness, direct neck pain associated with the injury, or any other sign the supervising school staff member determines emergency medical attention available when the student-athlete needed. Ιf exhibiting signs or symptoms, the student-athlete will be evaluated by the school or team physician. The Principal or designee shall contact the student-athlete's parent and the parent of the suspected sports-related concussion or other head injury.

Possible signs of a concussion can be observed by any school staff member or the school or team physician. possible symptoms of a concussion can be reported by the student-athlete to: coaches; licensed athletic trainer; school or team physician; school nurse; and/or parent. Principal or designee shall provide the student-athlete of with Education Board approved suggestions management/medical checklist to provide to their parent and physician or other licensed healthcare professional trained evaluation and management of sports-related concussions and other head injuries.

student-athlete interscholastic who participates in athletics and who sustains or is suspected of sustaining a concussion or other head injury shall be required to have a

medical examination conducted by their physician licensed health care provider. The student-athlete's physician or licensed health care provider shall be trained in the evaluation and management of concussion to determine the presence or absence of a sports-related concussion or head injury.

The student-athlete's physician or licensed health care provider must provide to the school district a written medical release/clearance for the student-athlete indicating when the student-athlete is able to return to the activity. The medical release/clearance must indicate the student-athlete is asymptomatic at rest and either may return to the interscholastic athletic activity because the injury was not a concussion or other head injury or may begin the district's graduated return to competition and practice protocol outlined in Regulation 2431.4. A medical release/clearance not in compliance with this Policy will The medical release/clearance must be not be accepted. reviewed and approved by the school or team physician.

The school district shall provide a copy of this Policy and Regulation 2431.4 to all youth sports team organizations that operate on school grounds. In accordance with the provisions of N.J.S.A. 18A:40-41.5, the school district shall not be liable for the injury or death of a person due to the action or inaction of persons employed by, or under youth sports team organization that with, a operates on school grounds, if the youth sports team organization provides the school district proof of insurance policy in the amount of not less than \$50,000 per per occurrence insuring the youth sports team person, organization against liability for any bodily injury suffered by a person and a statement of compliance with the school district's Policy and Regulation 2431.4 - Prevention and Treatment of Sports-Related Concussions and Injuries.

For the purposes of this Policy a "youth sports team organization" means one or more sports teams organized
